

ABU SALEH M NASIM

BBA Finance at BUP · CA student at ICAB · sometimes writing, sometimes coding

Dhaka, Bangladesh • +8801410313638 • nasimabeer7@gmail.com • linkedin.com/in/abusalehmnasim • github.com/abusalehmnasim

EDUCATION

Bangladesh University of Professionals (BUP)

Expected May 2027

Bachelor of Business Administration · Major in Finance

Undergraduate program focused on corporate finance, capital markets, accounting, and business analytics.

Institute of Chartered Accountants of Bangladesh (ICAB)

Certificate Level Cleared

Chartered Accountancy · Pre-articled Student

Professional accountancy qualification covering financial reporting, audit, taxation, and business law.

EXPERIENCE & LEADERSHIP

Vice President — Adamjee Cantonment Public School Science Club

Leadership

- Led science-based activities across the student body
- Organized educational programs and outreach events
- Managed student engagement and membership initiatives

Vice President — Adamjee Cantonment College Quiz Club

Leadership

- Organized inter-college quiz competitions
- Coordinated events end-to-end with the executive committee
- Developed academic engagement programs for members

Member — BUP Debate Club

Current

- Participate in competitive debate activities
- Develop analytical reasoning and structured communication

Policy Envoy — Youth Policy Forum

Current

- Contribute to policy discussions and roundtables
- Participate in youth-focused policy initiatives
- Work on civic engagement and policy awareness campaigns

SELECTED PROJECTS

Daam Kemon (GitHub Repo Available)

May 2026 – ongoing

A grocery price intelligence engine for Bangladesh. Live-scrapes Chaldal, Shwapno, and Othoba every 6 hours, normalizes messy listings using a tiered confidence-scoring matcher, and aggregates by item type and size to present a unified price-comparison view with a delivery-fee aware basket optimizer.

Highlights: Live-scrapes multiple e-commerce stores with Playwright and Chromium | Unified messy Bangla/English listings via 5-tier confidence matcher | Basket optimizer computes optimal split across stores considering delivery fees

Technologies: Python, FastAPI, Next.js, Playwright, PostgreSQL, Tailwind CSS

Dhaka Restaurant Directory (GitHub Repo Available)

Jan 2026 – Apr 2026

Full-stack data analytics project that ingests open-source geographic data, cleans it through an automated pipeline, and serves a live, interactive directory of Dhaka restaurants.

Highlights: Live dashboard utilizing open-source geographic data | Automated cleaning and enrichment pipeline | End-to-end deployment from ingestion to UI

Technologies: Python, SQL, APIs, Data Analytics, Web Deployment

DSE Market Prediction (GitHub Repo Available)

Mar 2026 – ongoing

Machine learning project that forecasts Dhaka Stock Exchange movements using XGBoost on engineered financial features, with rigorous backtesting and feature analysis.

Highlights: Applied gradient boosting to financial time-series | Engineered features from market and fundamentals data | Evaluated model robustness across market regimes

Technologies: Python, XGBoost, Machine Learning, Financial Analytics, Data Science

RESEARCH & PUBLICATIONS

Retail Strategy and Customer Loyalty in Bangladesh's Modern Grocery Sector

2026

A Theoretical Framework for Shwapno's Sustainable Market Leadership

Published on **Social Science Research Network (SSRN)** · DOI: 10.2139/ssrn.6618879

Abstract: This paper develops a theoretical framework for understanding customer loyalty in Bangladesh's organized grocery retail sector, using Shwapno — the country's dominant grocery chain — as its empirical anchor. Drawing on the research methodology framework of Sekaran and Bougie (2016), the study identifies service quality, service innovation, and brand trust as independent variables; perceived value-for-money (PVM) as a mediating variable; and socioeconomic status (SES) as a moderating variable. Six hypotheses are proposed and grounded in established retail theory, including SERVQUAL (Parasuraman, Zeithaml & Berry, 1988), Zeithaml's value model (1988), and Morgan and Hunt's Commitment-Trust Theory (1994). The framework extends Western retail theory to an emerging-market context characterized by SES heterogeneity, high price sensitivity, and a transitioning retail landscape. Findings from this theoretical analysis suggest that the mediated pathway — service innovation driving loyalty through perceived value — is likely the most consequential, with SES amplifying this relationship among lower- and middle-income consumers. Theoretical and practical contributions for emerging-market retail management are discussed.

TECHNICAL SKILLS & INTERESTS

Finance & Accounting:	Financial Modeling, Three Statement Modeling, DCF Valuation, Financial Statement Analysis, Budgeting, Forecasting, Variance Analysis
Analytics:	Advanced Excel, Power BI, Data Visualization, Dashboard Development
Programming:	Python, SQL
Research:	Academic Writing, Quantitative Analysis, Policy Research, Data Interpretation

CERTIFICATIONS & ACHIEVEMENTS

DataCamp:	Associate Data Analyst — Professional certification covering data analysis fundamentals, SQL, and analytical reporting.
Government Talentpool Scholarship:	National-level academic scholarship recognizing outstanding academic performance.
Adamjee Cantonment College Principal's Prestigious Award:	Awarded for excellence in academics, leadership, and overall contribution to college life.
